Mr Ludwig Schwall  
Alpha Pumps Australia Pty Ltd  
15 Market Road  
**SUNSHINE, 3020**

Dear Ludwig,

As you are aware, we have several Helical Rotor Pumps in operation at our Quarry. The majority of these pumps are used in our Sand Washing Plant and, due to the abrasive nature of sand, we find that the rotors become extremely worn and need replacing more frequently than in other applications.

We have found that the supply from Europe is both expensive and uncertain in terms of delivery timeframes and were thrilled to find a local company who could accommodate our needs by reconditioning the rotors.

For the past year we have been sending our rotors to you and have been very pleased with the results. The rotors that you have reconditioned using new technology have come back with improved wear resistance resulting in twice their service life. This technology and the service your company provides has been a boon to us with less down time and higher production output.

We look forward to a long and rewarding business relationship with your company.

Yours sincerely,

**ANDREW BURDETT**  
**DIRECTOR**
